A little bit about us...

Established in 1991 by the late Dr Simon Coates, Sumo Wagyu entered the livestock industry with the goal of producing the most genetically elite Wagyu herd and a commitment to the advancement of the Wagyu breed.

Mrs Mary Coates

As many of you would know, Simon was deeply passionate about Wagyu cattle and had dedicated most of his life to the Wagyu industry. His wife, Mary Coates, has continued to operate the business along with the family, and will continue to serve you with the same commitment, high standards and values, that we have always had.

Our herd is located in the Northern Rivers of New South Wales, Australia which offers a fantastic base for raising cattle with continuous rainfall year-round. The operation is located on 1200 hectares of premium grazing country, complete with irrigation. The farm is run by our Head of Livestock and Genetics, Eric Fraser, together with his wife Miriam and an amazing group of people at Grafton as well as the admin team in Brisbane.

Our goal is to continue to honour founder Simon Coates' mission to establish 'One of the most elite Wagyu herds (outside of Japan) in the Western World today'.

SUMO WAGYU AUSTRALIA
